Operating Instructions
Before operating the unit, please read this manual thoroughly, and retain it for future reference.

For details on the advanced operations, please access “Cyber-shot Handbook” contained on the supplied CD-ROM via a computer.
Owner’s Record
The model and serial numbers are located on the bottom. Record the serial number in the space provided below. Refer to these numbers whenever you call upon your Sony dealer regarding this product.
Model No. DSC-W35/W55
Serial No. ___________________________

WARNING
To reduce fire or shock hazard, do not expose the unit to rain or moisture.

For Customers in the U.S.A.

IMPORTANT SAFEGUARDS

For your protection, please read these safety instructions completely before operating the appliance, and keep this manual for future reference.
Carefully observe all warnings, precautions and instructions on the appliance, or the one described in the operating instructions and adhere to them.

Use

Power Sources
This set should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of electrical power supplied to your home, consult your dealer or local power company. For those sets designed to operate from battery power, or other sources, refer to the operating instructions.

Polarization
This set may be equipped with a polarized ac power cord plug (a plug having one blade wider than the other).
This plug will fit into the power outlet only one way. This is a safety feature. If you are unable to insert the plug fully into the outlet, try reversing the plug. If the plug should still fail to fit, contact your electrician to have a suitable outlet installed. Do not defeat the safety purpose of the polarized plug by forcing it in.

Overloading
Do not overload wall outlets, extension cords or convenience receptacles beyond their capacity, since this can result in fire or electric shock.

Object and Liquid Entry
Never push objects of any kind into the set through openings as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the set.

Attachments
Do not use attachments not recommended by the manufacturer, as they may cause hazards.
Cleaning
Unplug the set from the wall outlet before cleaning or polishing it. Do not use liquid cleaners or aerosol cleaners. Use a cloth lightly dampened with water for cleaning the exterior of the set.

Installation

Water and Moisture
Do not use power-line operated sets near water – for example, near a bathtub, washbowl, kitchen sink, or laundry tub, in a wet basement, or near a swimming pool, etc.

Power-Cord Protection
Route the power cord so that it is not likely to be walked on or pinched by items placed upon or against them, paying particular attention to the plugs, receptacles, and the point where the cord exits from the appliance.

Accessories
Do not place the set on an unstable cart, stand, tripod, bracket, or table. The set may fall, causing serious injury to a child or an adult, and serious damage to the set. Use only a cart, stand, tripod, bracket, or table recommended by the manufacturer.

Ventilation
The slots and openings in the cabinet are provided for necessary ventilation. To ensure reliable operation of the set, and to protect it from overheating, these slots and openings must never be blocked or covered.
– Never cover the slots and openings with a cloth or other materials.
– Never block the slots and openings by placing the set on a bed, sofa, rug, or other similar surface.
– Never place the set in a confined space, such as a bookcase, or built-in cabinet, unless proper ventilation is provided.
– Do not place the set near or over a radiator or heat register, or where it is exposed to direct sunlight.

Lightning
For added protection for this set during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna or cable system. This will prevent damage to the set due to lightning and power-line surges.

Service

Damage Requiring Service
Unplug the set from the wall outlet and refer servicing to qualified service personnel under the following conditions:
– When the power cord or plug is damaged or frayed.
– If liquid has been spilled or objects have fallen into the set.
– If the set has been exposed to rain or water.
– If the set has been subject to excessive shock by being dropped, or the cabinet has been damaged.
– If the set does not operate normally when following the operating instructions. Adjust only those controls that are specified in the operating instructions. Improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the set to normal operation.
– When the set exhibits a distinct change in performance – this indicates a need for service.

Servicing
Do not attempt to service the set yourself as opening or removing covers may expose you to dangerous voltage or other hazards.
Refer all servicing to qualified service personnel.

Replacement parts
When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer that have the same characteristics as the original parts. Unauthorized substitutions may result in fire, electric shock, or other hazards.

Safety Check
Upon completion of any service or repairs to the set, ask the service technician to perform routine safety checks (as specified by the manufacturer) to determine that the set is in safe operating condition.
Read this first

CAUTION
Replace the battery with the specified type only. Otherwise, fire or injury may result.

For Customers in the U.S.A.
If you have any questions about this product, you may call:
Sony Customer Information Center
1-800-222-SONY (7669)
The number below is for the FCC related matters only.

RECYCLING LITHIUM-ION BATTERIES
Lithium-Ion batteries are recyclable.
You can help preserve our environment by returning your used rechargeable batteries to the collection and recycling location nearest you.

For more information regarding recycling of rechargeable batteries, call toll free 1-800-822-8837, or visit http://www.rbrc.org/

Caution: Do not handle damaged or leaking Lithium-Ion batteries.

For Customers in the U.S.A. and Canada

Battery charger
This power unit is intended to be correctly orientated in a vertical or floor mount position.

Regulatory Information

Declaration of Conformity
Trade Name: SONY
Model No.: DSC-W55
Responsible Party: Sony Electronics Inc.
Address: 16530 Via Esprillo,
San Diego, CA 92127 U.S.A.
Telephone No.: 858-942-2230

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Declaration of Conformity
Trade Name: SONY
Model No.: DSC-W35
Responsible Party: Sony Electronics Inc.
Address: 16530 Via Esprillo,
San Diego, CA 92127 U.S.A.
Telephone No.: 858-942-2230

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
CAUTION
You are cautioned that any changes or modifications not expressly approved in this manual could void your authority to operate this equipment.

Note:
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

– Reorient or relocate the receiving antenna.
– Increase the separation between the equipment and receiver.
– Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
– Consult the dealer or an experienced radio/TV technician for help.

The supplied interface cable must be used with the equipment in order to comply with the limits for a digital device pursuant to Subpart B of Part 15 of FCC Rules.

For Customers in Europe
This product has been tested and found compliant with the limits set out in the EMC Directive for using connection cables shorter than 3 meters (9.8 feet).

Attention
The electromagnetic fields at the specific frequencies may influence the picture and sound of this unit.

Notice
If static electricity or electromagnetism causes data transfer to discontinue midway (fail), restart the application or disconnect and connect the communication cable (USB, etc.) again.

Disposal of Old Electrical & Electronic Equipment (Applicable in the European Union and other European countries with separate collection systems)
This symbol on the product or on its packaging indicates that this product shall not be treated as household waste. Instead it shall be handed over to the applicable collection point for the recycling of electrical and electronic equipment. By ensuring this product is disposed of correctly, you will help prevent potential negative consequences for the environment and human health, which could otherwise be caused by inappropriate waste handling of this product. The recycling of materials will help to conserve natural resources.

For the State of California, USA only
Perchlorate Material - special handling may apply. See www.dtsc.ca.gov/hazardouswaste/perchlorate
Perchlorate Material : Lithium battery contains perchlorate.
Notice for customers in the United Kingdom

A moulded plug complying with BS 1363 is fitted to this equipment for your safety and convenience.

Should the fuse in the plug supplied need to be replaced, a fuse of the same rating as the supplied one and approved by ASTA or BSI to BS 1362, (i.e., marked with an \( \mathbb{G} \) or \( \mathbb{G} \) mark) must be used.

If the plug supplied with this equipment has a detachable fuse cover, be sure to attach the fuse cover after you change the fuse. Never use the plug without the fuse cover. If you should lose the fuse cover, please contact your nearest Sony service station.

Notes on using your camera

Internal memory and "Memory Stick Duo" back up
Do not turn off the camera or remove the battery pack or "Memory Stick Duo" while the access lamp is lighted, as the internal memory data or "Memory Stick Duo" data may be destroyed. Always protect your data by making a back up copy.

Notes on recording/playback
- Before you record, make a trial recording to make sure that the camera is working correctly.
- This camera is neither dust-proof, nor splash-proof, nor water-proof. Read “Precautions” (page 31) before operating the camera.
- Be careful not to get the camera wet. Water entering the inside of the camera may cause malfunctions which in some cases may not be repairable.
- Do not aim the camera at the sun or other bright light. It may cause the malfunction of your camera.
- Do not use the camera near a location that generates strong radio waves or emits radiation. The camera may not be able to record or play back properly.
- Using the camera in sandy or dusty locations may cause malfunctions.
- If moisture condensation occurs, remove it before using the camera (page 31).
- Do not shake or strike the camera. In addition to malfunctions and an inability to record images, this may render the recording medium unusable, or cause image data breakdown, damage or loss.
- Clean the flash surface before use. The heat of flash emission may cause dirt on the flash surface to become discolored or to stick to the flash surface, resulting in insufficient light emission.

Notes on the LCD screen
- The LCD screen is manufactured using extremely high-precision technology so over 99.99% of the pixels are operational for effective use. However, there may be some tiny black points and/or bright points (white, red, blue or green in color) that constantly appear on the LCD screen. These points are normal in the manufacturing process and do not affect the recording in any way.
- The camera will not function with the lens portion extended when the battery pack is discharged. Insert a charged battery pack, then turn on the camera again.

On image data compatibility
- This camera conforms with DCF (Design rule for Camera File system) universal standard established by JEITA (Japan Electronics and Information Technology Industries Association).
- Playback of images recorded with your camera on other equipment and playback of images recorded or edited with other equipment on your camera are not guaranteed.

Warning on copyright
Television programs, films, videotapes, and other materials may be copyrighted. Unauthorized recording of such materials may be contrary to the provisions of the copyright laws.

No compensation for contents of the recording
The contents of the recording cannot be compensated for if recording or playback is not possible due to a malfunction of your camera or recording media, etc.

On illustrations
Illustrations used in this manual are of the DSC-W55 unless noted otherwise.
Getting started

Checking the accessories supplied

- Battery charger BC-CSG/BC-CSGB/BC-CSGC (1)
- Power cord (mains lead) (1) (not supplied in the USA and Canada)
- Rechargeable battery pack NP-BG1 (1)/Battery case (1)

- USB, A/V cable for multi-use terminal (1) (DSC-W55)
- USB cable (1) (DSC-W35)
- A/V cable (1) (DSC-W35)
- Wrist strap (1)
- CD-ROM (Cyber-shot application software/“Cyber-shot Handbook”) (1)
- Instruction Manual (this manual) (1)

Attach the strap and pass your hand through it to prevent the camera from damage by being dropped, etc.
1 Preparing the battery pack

1 Insert the battery pack into the battery charger.

2 Connect the battery charger to the wall outlet (wall socket).

   The CHARGE lamp lights on, and charging starts.
   When the CHARGE lamp turns off, charging is finished (Practical charge).
   If you continue charging the battery pack for about one more hour (until it is fully charged), the charge
   will last slightly longer.

Charging time

<table>
<thead>
<tr>
<th></th>
<th>Full charge time</th>
<th>Practical charge time</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Approx. 330 min.</td>
<td>Approx. 270 min.</td>
</tr>
</tbody>
</table>

- Time required to charge a fully depleted battery pack at a temperature of 25°C (77°F). Charging may take
  longer under certain circumstances or conditions.
- For details on the battery life and memory capacity, see page 26.
- Connect the battery charger to an easily accessible wall outlet (wall socket) close by.
- Even if the CHARGE lamp is not lit, the battery charger is not disconnected from the AC power source
  (mains) as long as it is connected to the wall outlet (wall socket). If some trouble occurs while using the
  battery charger, immediately shut off the power by disconnecting the plug from the wall outlet (wall
  socket).
- When charging is finished, disconnect the power cord (mains lead) from the wall outlet (wall socket), and
  remove the battery pack from the battery charger.
- Designed for use with compatible Sony batteries.
2 Inserting the battery pack/a “Memory Stick Duo” (not supplied)

1 Open the battery/“Memory Stick Duo” cover.

2 Insert the “Memory Stick Duo” (not supplied) all the way in until it clicks.

3 Insert the battery pack.

4 Close the battery/“Memory Stick Duo” cover.

When there is no “Memory Stick Duo” inserted
The camera records/plays back images using the internal memory (approx. 56 MB).

To check the remaining battery time
Press POWER button to turn on and check the remaining battery on the LCD screen.

| Battery remaining indicator | Sufficient power remaining | Slightly consumed | Battery half full | Battery low, recording/playback will stop soon | Change the battery with fully charged one, or charge the battery. (The warning indicator flashes.) |

- It takes about one minute until the correct battery remaining indicator appears.
- The displayed battery remaining indicator may not be correct under certain circumstances.
- The Clock Set screen appears when the camera is turned on for the first time (page 13).
To remove the battery pack/“Memory Stick Duo”

Open the battery/“Memory Stick Duo” cover.

“Memory Stick Duo”

- Make sure that the access lamp is not lit, then push the “Memory Stick Duo” in once.

Battery pack

- Slide the battery eject lever.
  - Be sure not to drop the battery pack.

- Never remove the battery pack/“Memory Stick Duo” when the access lamp is lit, otherwise the data may be destroyed.
3 Turning the camera on/setting the clock

1 Select  with the mode dial, then press the POWER button.

2 Set the clock with the control button.
   1 Select the date display format with ▲/▼, then press ●.
   2 Select each item with ◀/▶ and set the numeric value with ▲/▼, then press ●.
   3 Select [OK] with ▶, then press ●.

To change the date and time
Select [Clock Set] in the  (Setup) screen (page 21).

When you turn on the power
- Unless you set the clock, the Clock Set screen appears each time the camera is turned on.
- If the camera is running on battery power and you do not operate the camera for about three minutes, the camera turns off automatically to prevent wearing down the battery pack (Auto power-off function).
Shooting images easily

1 Select a mode with the mode dial.
   Still image (auto adjustment mode): Select ．
   Movie: Select ．

2 Hold the camera steady, keeping your arm at your side.

3 Shoot with the shutter button.
   Still image:
   1 Press and hold the shutter button halfway down to focus.
      The (AE/AF lock) indicator (green) flashes, a beep sounds, the indicator stops flashing and remains lit.
   2 Press the shutter button fully down.
      The shutter sounds.

   Movie:
   Press the shutter button fully down.
   To stop recording, press the shutter button fully down again.
Selecting the mode dial

Set the mode dial to the desired function.

Auto Adjustment
Allows easy shooting with the settings adjusted automatically.

Program Auto
Allows you to shoot with the exposure adjusted automatically (both the shutter speed and the aperture value). Also you can select various settings using the menu.

Movie
Record movie with sound.

High Sensitivity
Shoot images without a flash even in low lighting.

Soft Snap
Shoot a person’s skin with a warmer look.

Twilight Portrait
Shoot sharp images of people in a dark place without losing the nighttime atmosphere.

Twilight
Shoot night scenes without losing the nighttime atmosphere.

Landscape
Shoot with the focus on a distant subject.

Beach
Shoot seaside or lakeside scenes with the blueness of the water captured more vividly.

Snow
Shoot snow scenes in white more clearly.

Using the zoom

Slide the zoom lever.
- When the zoom scale exceeds 3x, the camera uses the Digital Zoom function.
- You cannot change the zoom scale while shooting a movie.

Flash (Selecting a flash mode for still images)

Press ▲ (.Footer) on the control button repeatedly until the desired mode is selected.

Flash Auto
Strobes when there is insufficient light or backlight (default setting)

Flash forced on

Slow synchro (Flash forced on)
The shutter speed is slow in a dark place to clearly shoot the background that is out of flash light.

Flash forced off

Macro (Shooting close-up)

Press ▼ (Footer) on the control button.
To cancel, press ▼ again.

Macro off

Macro on (W side: Approx. 2 cm or farther (13/16 inches or farther), T side: Approx. 30 cm or farther (11 7/8 inches or farther))

Using the self-timer

Press ▼ (Footer) on the control button repeatedly until the desired mode is selected.

Not using the self-timer

Setting the 10-second delay self-timer

Setting the 2-second delay self-timer

Press the shutter button, the self-timer lamp flashes, and a beep sounds until the shutter operates.
EV (Adjusting the exposure)
Press \( \downarrow \) (\( \square \)) on the control button, then press \( \uparrow/\downarrow \) to adjust the exposure.
Toward +: Brightens an image.
Toward -: Darkens an image.
To turn off the EV adjustment bar, press the \( \uparrow \) button again.

DISP Changing the screen display
Each time you press the DISP (Screen display switch) button, the display changes as follows.

- Histogram on
- Indicators off
- LCD screen off
- Indicators on

To change the image size
Press the \( \bigcirc \)/\( \bigcirc \) (Image Size) button, then press \( \uparrow/\downarrow \) to select the size.
To turn off the Image Size menu, press the \( \bigcirc \)/\( \bigcirc \) button again.

On the recordable number of still images and recordable time of movies
Recordable number of still images and recordable time of movies vary depending on the selected image size.

Still images
Maximum number of recordable images

Movies
Maximum recordable time

- The number of recordable images and time can differ according to shooting conditions.
Viewing/deleting images

1 Press (Playback) button.

- If you press (Playback) button when the camera is powered off, the camera is turned on in the playback mode. If you press again, switches to recording mode.

2 Select an image with ◀/▶ on the control button.

Movie:
Press ◀ to play back a movie. (Press ◀ again to stop playback.)
Press ▶ to fast forward, press ◀ to rewind. (Press ◀ to return to normal playback.)
Press ▲/▼ to adjust the volume.

To delete images
1 Display the image you want to delete and press / (Delete).
2 Select [Delete] with ▲, then press ◀.

To view an enlarged image (playback zoom)
Slide (playback zoom) lever while displaying a still image. To undo the zoom, slide (playback zoom) lever.
Adjust the portion: ▲/▼/◀/▶
Cancel playback zoom: ◀

Viewing an index screen
Slide (Index) lever and select an image with ▲/▼/◀/▶. To display the next (previous) index screen, press ◀/▶.
To return to the single-image screen, press ◀.
To delete images in index mode
1 While an index screen is displayed, press \( \text{\textsuperscript{[}D\text{\textsuperscript{]}}} \) (Delete) and select [Select] with \( \text{\textsuperscript{\textup{\textbullet}}} / \text{\textsuperscript{\textdownarrow}} \) on the control button, then press \( \text{\textsuperscript{\textbullet}} \).
2 Select the image you want to delete with \( \text{\textsuperscript{\textup{\textbullet}}} / \text{\textsuperscript{\textdownarrow}} / \text{\textsuperscript{\textleft}} / \text{\textsuperscript{\textright}} \), then press \( \text{\textsuperscript{\textbullet}} \) to display the \( \text{\textsuperscript{\textbullet}}} \) (Delete) indicator on the selected image.
3 Press \( \text{\textsuperscript{\textbullet}}} / \text{\textsuperscript{\textbullet}}} \) (Delete).
4 Select [OK] with \( \text{\textsuperscript{\textbullet}}} \), then press \( \text{\textsuperscript{\textbullet}} \).

To view images on TV screen
Connect the camera to the TV with the cable for multi-use terminal (DSC-W55) or the A/V cable (DSC-W35).

Enjoying your computer

You can display images shot with the camera on the computer. Also, you can use still images and movies from the camera more than ever by taking advantage of the software. For details, refer to “Cyber-shot Handbook.”

Supported Operating Systems for USB connection and application software (supplied)

<table>
<thead>
<tr>
<th>USB connection</th>
<th>For Windows users</th>
<th>For Macintosh users</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Windows 2000 Professional, Windows XP Home Edition or Windows XP Professional</td>
<td>Mac OS 9.1/9.2/ Mac OS X(v10.1 to v10.4)</td>
</tr>
<tr>
<td>Application software “Picture Motion Browser”</td>
<td>Windows 2000 Professional, Windows XP Home Edition or Windows XP Professional</td>
<td>not compatible</td>
</tr>
</tbody>
</table>

- Must be installed with above OS at delivery.
- If your OS does not support USB connections, use a commercially available Memory Stick Reader/Writer.
- For further details on the operating environment of Cyber-shot application software, “Picture Motion Browser”, refer to “Cyber-shot Handbook.”

Viewing “Cyber-shot Handbook”

**For Windows users**

1. Turn on your computer, and insert the CD-ROM (supplied) into the CD-ROM drive. The screen below appears.

![Cyber-shot Application Software](image)

When you click the [Cyber-shot Handbook] button, the screen for copying “Cyber-shot Handbook” appears. Follow the on-screen instructions to copy.

2. After the installation is complete, double-click the shortcut created on the desktop.

**For Macintosh users**

1. Turn on your computer, and insert the CD-ROM (supplied) into the CD-ROM drive. Select the “Handbook” folder and copy “Handbook.pdf” stored in the “GB” folder to your computer.

2. After copying is complete, double-click “Handbook.pdf.”
Battery life and memory capacity

The tables show the approximate number of images that can be recorded/viewed and the battery life when you shoot images in [Normal] mode with the battery pack (supplied) at full capacity and at an ambient temperature of 25°C (77°F). The numbers of images that can be recorded or viewed take into account changing the “Memory Stick Duo” as necessary.

Note that the actual numbers may be less than those indicated in the table depending on the conditions of use.

- Battery capacity decreases as you use it more, as the time passes.
- The number of images that can be recorded/viewed and the battery life are decreased under the following conditions:
  - The surrounding temperature is low.
  - The flash is used frequently.
  - The camera has been turned on and off many times.
  - The zoom is used frequently.
  - The brightness of LCD Backlight is set to up (DSC-W55 only).
  - [AF Mode] is set to [Monitor].
  - The battery power is low.

When shooting still images

<table>
<thead>
<tr>
<th>LCD screen</th>
<th>No. of images</th>
<th>Battery life (min.)</th>

</tr>
<tr>
<td>On</td>
<td>Approx. 380</td>
<td>Approx. 190</td>
</tr>
<tr>
<td>Off</td>
<td>Approx. 480</td>
<td>Approx. 240</td>
</tr>
</tbody>
</table>

• Shooting in the following situations:
  - ◇: (P.Quality) is set to [Fine].
  - [AF Mode] is set to [Single].
  - Shooting once every 30 seconds.
  - The zoom is switched alternately between the W and T ends.

- The flash strobes once every two times.
- The power turns on and off once every ten times.

- The measurement method is based on the CIPA standard.
  (CIPA: Camera & Imaging Products Association)

- The number of images/battery life does not change, regardless of image size.

When viewing still images

</tbody>
</table>

- Movies with the size set to [640(Fine)] can only be recorded on a “Memory Stick PRO Duo”.
- Recordable movie file size is up to approx. 2 GB for each file. If the size reaches approx. 2 GB, the camera stops recording automatically.
- When images recorded using earlier Sony models are played back on this camera, the display may differ from the actual image size.
Troubleshooting

If you experience trouble with your camera, try the following solutions.

1. **Check the items below, and refer to “Cyber-shot Handbook” (PDF).**
   If a code such as “C/E:□□:□□” appears on the screen, refer to “Cyber-shot Handbook.”

2. **Remove the battery pack, and insert the battery pack again after about one minute, and turn on the power.**

3. **Initialize the settings (page 24).**

4. **Consult your Sony dealer or local authorized Sony service facility.**

Please understand that you give your consent that the contents of the internal memory may be checked when you send your camera to be repaired.

**Battery pack and power**

**The battery pack cannot be installed.**
- Install the battery pack correctly using the tip of the battery pack to push the battery eject lever (page 11).

**Cannot turn on the camera.**
- Install the battery pack correctly (page 11).
- The battery pack is discharged. Install charged battery pack (page 10).
- The battery pack is dead. Replace it with a new one.
- Use a recommended battery pack (page 9).

**The power turns off suddenly.**
- If you do not operate the camera for about three minutes while the power is on, the camera turns off automatically to prevent wearing down the battery pack. Turn on the camera again (page 13).
- The battery pack is dead. Replace it with a new one.

**The battery cannot be charged.**
- You cannot charge the battery with the AC adaptor (not supplied).
The battery remaining indicator is incorrect.

- This phenomenon occurs when you use the camera in an extremely hot or cold location.
- The displayed battery remaining differs from the current one. Fully discharge and then charge the battery pack to correct the display.
- The battery pack is discharged. Install the charged battery pack (page 10).
- The battery pack is dead. Replace it with a new one.

Shooting still images/movies

Your camera cannot record images.

- Check the free capacity of the internal memory or “Memory Stick Duo” (pages 27, 28). If it is full, do one of the following:
  - Delete unnecessary images (page 17).
  - Change the “Memory Stick Duo”.
- You are using the “Memory Stick Duo” with the write-protect switch, and the switch is set to the LOCK position. Set the switch to the recording position.
- You cannot record images while charging the flash.
- Set the mode dial to a position other than when shooting a still image.
- Set the mode dial to when shooting movies.
- The image size is set to [640(Fine)] when recording movies. Do one of the following:
  - Set the image size to other than [640(Fine)].
  - Insert a “Memory Stick PRO Duo”.

Cannot insert dates on images.

- This camera does not have a feature for superimposing dates on images. You can print or save images with the date inserted using “Picture Motion Browser”.

Viewing images

Your camera cannot play back images.

- Press (Playback) button (page 17).
- The folder/file name has been changed on your computer.
- When an image file has been processed by a computer or when the image file was recorded using a model other than that of your camera, playback on your camera is not guaranteed.
- The camera is in USB mode. Delete the USB connection.
Precautions

Do not use/store the camera in the following places
- In an extremely hot, cold or humid place
  In places such as in a car parked in the sun, the
camera body may become deformed and this
may cause a malfunction.
- Under direct sunlight or near a heater
  The camera body may become discolored or
deformed, and this may cause a malfunction.
- In a location subject to rocking vibration
- Near strong magnetic place
- In sandy or dusty places
  Be careful not to let sand or dust get into the
camera. This may cause the camera to
malfunction, and in some cases this malfunction
cannot be repaired.

On carrying
Do not sit down in a chair or other place with the
camera in the back pocket of your trousers or
skirt, as this may cause malfunction or damage the
camera.

On cleaning
Cleaning the LCD screen
Wipe the screen surface with an LCD cleaning kit
(not supplied) to remove fingerprints, dust, etc.
Cleaning the lens
Wipe the lens with a soft cloth to remove
fingerprints, dust, etc.
Cleaning the camera surface
Clean the camera surface with a soft cloth slightly
moistened with water, then wipe the surface with
a dry cloth. Do not use the following as they may
damage the finish or the casing.
- Chemical products such as thinner, benzine,
alcohol, disposable cloths, insect repellent,
sunscreen or insecticide, etc.
- Do not touch the camera with the above on your
hand.
- Do not leave the camera in contact with rubber
or vinyl for a long time.

On operating temperatures
Your camera is designed for use under the
temperatures between 0°C and 40°C (32°F and
104°F). Shooting in extremely cold or hot places
that exceed this range is not recommended.

On moisture condensation
If the camera is brought directly from a cold to a
warm location, moisture may condense inside or
outside the camera. This moisture condensation
may cause a malfunction of the camera.
If moisture condensation occurs
Turn off the camera and wait about an hour for the
moisture to evaporate. Note that if you attempt to
shoot with moisture remaining inside the lens, you
will be unable to record clear images.

On the internal rechargeable backup battery
This camera has an internal rechargeable battery
for maintaining the date and time and other
settings regardless of whether the power is on or
off.
This rechargeable battery is continually charged
as long as you are using the camera. However, if
you use the camera for only short periods, it
discharges gradually, and if you do not use the
camera at all for about one month it becomes
completely discharged. In this case, be sure to
charge this rechargeable battery before using the
camera.
However, even if this rechargeable battery is not
charged, you can still use the camera as long as
you do not record the date and time.
Charging method of the internal rechargeable backup battery
Insert charged battery pack in the camera and
leave the camera for 24 hours or more with the
power off.
Specifications

Camera

[System]
Image device: 7.20 mm (1/2.5 type) color CCD, Primary color filter
Total pixel number of camera:
Approx. 7 410 000 pixels
Effective pixel number of camera:
Approx. 7 201 000 pixels
Lens: Carl Zeiss Vario-Tessar 3× zoom lens f = 6.3 – 18.9 mm (38 – 114 mm when converted to a 35 mm still camera) F2.8 – 5.2
Exposure control: Automatic exposure, Scene Selection (7 modes)
White balance: Automatic, Daylight, Cloudy, Fluorescent, Incandescent, Flash
File format (DCF compliant):
Still images: Exif Ver. 2.21 JPEG compliant, DPOF compatible
Movies: MPEG1 compliant (Monaural)
Recording media: Internal Memory (approx. 56 MB), “Memory Stick Duo”
Flash: Flash range (ISO sensitivity (Recommended Exposure Index) set to Auto): approx. 0.2 to 3.9 m (7 7/8 inches to 12 feet) 9 5/8 inches) (W)/approx. 0.3 to 2.0 m (11 7/8 inches to 6 feet 3/4 inches) (T)

[Input and Output connectors]
DSC-W55
Multi connector: Video, Audio (Monaural), USB communication
USB communication: Hi-Speed USB (USB 2.0 compliant)
DSC-W35
A/V OUT jack: Minijack Video, Audio (Monaural)
USB jack: mini-B
USB communication: Hi-Speed USB (USB 2.0 compliant)

[LCD screen]
DSC-W55
LCD panel: 6.2 cm (2.5 type) TFT drive
Total number of dots: 115 200 (480×240) dots
DSC-W35
LCD panel: 5.1 cm (2.0 type) TFT drive
Total number of dots: 84 960 (354×240) dots

[Power, general]
Power: Rechargeable battery pack NP-BG1, 3.6 V AC-LS5K AC Adaptor (not supplied), 4.2 V
Power consumption (during shooting with the LCD screen on):
DSC-W55
1.0 W
DSC-W35
1.0 W
Operating temperature: 0 to 40°C (32 to 104°F)

Storage temperature: –20 to +60°C (–4 to +140°F)
Dimensions:
DSC-W55
88.9×57.1×22.9 mm (3 1/2×2 1/4×9/32 inches) (W/H/D, excluding protrusions)
DSC-W35
89.8×59.1×22.9 mm (3 5/8×2 3/8×9/32 inches) (W/H/D, excluding protrusions)
Mass:
DSC-W55
Approx. 147 g (5.2 oz) (including NP-BG1 battery pack and wrist strap, Etc.)
DSC-W35
Approx. 149 g (5.3 oz) (including NP-BG1 battery pack and wrist strap, Etc.)
Microphone: Monaural
Speaker: Monaural
Exif Print: Compatible
PRINT Image Matching III: Compatible
PictBridge: Compatible

BC-CSG/BC-CSGB/BC-CSGC battery charger
Power requirements: AC 100 to 240 V, 50/60 Hz, 2 W (BC-CSG/BC-CSGC) 2.6 W (BC-CSGB)
Output voltage: DC 4.2 V, 0.25 A
Operating temperature: 0 to 40°C (32 to 104°F)
Storage temperature: –20 to +60°C (–4 to +140°F)
Dimensions: Approx. 62×24×91 mm (2 1/2×3 1/32×3 5/8 inches) (W/H/D)
Mass: Approx. 75 g (2.7 oz)

Rechargeable battery pack NP-BG1
Used battery: Lithium-ion battery
Maximum voltage: DC 4.2 V
Nominal voltage: DC 3.6 V
Capacity: 3.4 Wh (960 mAh)
