For details on advanced operations, please read “Cyber-shot Handbook” (PDF) and “Cyber-shot Step-up Guide” on the CD-ROM (supplied) using a computer.

Operating Instructions
Before operating the unit, please read this manual thoroughly, and retain it for future reference.
Owner's Record
The model and serial numbers are located on the bottom. Record the serial number in the space provided below. Refer to these numbers whenever you call upon your Sony dealer regarding this product.
Model No. DSC-W300
Serial No. ___________________________

IMPORTANT SAFEGUARDS

For your protection, please read these safety instructions completely before operating the appliance, and keep this manual for future reference. Carefully observe all warnings, precautions and instructions on the appliance, or the one described in the operating instructions and adhere to them.

WARNING

To reduce fire or shock hazard, do not expose the unit to rain or moisture.

For Customers in the U.S.A.

Power Sources
This set should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of electrical power supplied to your home, consult your dealer or local power company. For those sets designed to operate from battery power, or other sources, refer to the operating instructions.

Polarization
This set may be equipped with a polarized ac power cord plug (a plug having one blade wider than the other). This plug will fit into the power outlet only one way. This is a safety feature. If you are unable to insert the plug fully into the outlet, try reversing the plug. If the plug should still fail to fit, contact your electrician to have a suitable outlet installed. Do not defeat the safety purpose of the polarized plug by forcing it in.

Overloading
Do not overload wall outlets, extension cords or convenience receptacles beyond their capacity, since this can result in fire or electric shock.

Object and Liquid Entry
Never push objects of any kind into the set through openings as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the set.

Attachments
Do not use attachments not recommended by the manufacturer, as they may cause hazards.
Cleaning

Unplug the set from the wall outlet before cleaning or polishing it. Do not use liquid cleaners or aerosol cleaners. Use a cloth lightly dampened with water for cleaning the exterior of the set.

Installation

Water and Moisture

Do not use power-line operated sets near water – for example, near a bathtub, washbowl, kitchen sink, or laundry tub, in a wet basement, or near a swimming pool, etc.

Power-Cord Protection

Route the power cord so that it is not likely to be walked on or pinched by items placed upon or against them, paying particular attention to the plugs, receptacles, and the point where the cord exits from the appliance.

Accessories

Do not place the set on an unstable cart, stand, tripod, bracket, or table. The set may fall, causing serious injury to a child or an adult, and serious damage to the set. Use only a cart, stand, tripod, bracket, or table recommended by the manufacturer.

Ventilation

The slots and openings in the cabinet are provided for necessary ventilation. To ensure reliable operation of the set, and to protect it from overheating, these slots and openings must never be blocked or covered.

– Never cover the slots and openings with a cloth or other materials.
– Never block the slots and openings by placing the set on a bed, sofa, rug, or other similar surface.
– Never place the set in a confined space, such as a bookcase, or built-in cabinet, unless proper ventilation is provided.
– Do not place the set near or over a radiator or heat register, or where it is exposed to direct sunlight.

Lightning

For added protection for this set during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna or cable system. This will prevent damage to the set due to lightning and power-line surges.

Service

Damage Requiring Service

Unplug the set from the wall outlet and refer servicing to qualified service personnel under the following conditions:

– When the power cord or plug is damaged or frayed.
– If liquid has been spilled or objects have fallen into the set.
– If the set has been exposed to rain or water.
– If the set has been subject to excessive shock by being dropped, or the cabinet has been damaged.
– If the set does not operate normally when following the operating instructions. Adjust only those controls that are specified in the operating instructions. Improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the set to normal operation.
– When the set exhibits a distinct change in performance – this indicates a need for service.

Servicing

Do not attempt to service the set yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

Replacement parts

When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer that have the same characteristics as the original parts. Unauthorized substitutions may result in fire, electric shock, or other hazards.

Safety Check

Upon completion of any service or repairs to the set, ask the service technician to perform routine safety checks (as specified by the manufacturer) to determine that the set is in safe operating condition.
Read this first

CAUTION

Replace the battery with the specified type only. Otherwise, fire or injury may result.

Do not expose the batteries to excessive heat such as sunshine, fire or the like.

For Customers in the U.S.A. and Canada

RECYCLING LITHIUM-ION BATTERIES

Lithium-Ion batteries are recyclable.

You can help preserve our environment by returning your used rechargeable batteries to the collection and recycling location nearest you.

For more information regarding recycling of rechargeable batteries, call toll free 1-800-822-8837, or visit http://www.rbrc.org/

Caution: Do not handle damaged or leaking Lithium-Ion batteries.

Battery charger

This power unit is intended to be correctly orientated in a vertical or floor mount position.

For Customers in the U.S.A.

If you have any questions about this product, you may call:

Sony Customer Information Center
1-800-222-SONY (7669)
The number below is for the FCC related matters only.

Regulatory Information

Declaration of Conformity
Trade Name: SONY
Model No.: DSC-W300
Responsible Party: Sony Electronics Inc.
Address: 16530 Via Esprillo, San Diego, CA 92127 U.S.A.
Telephone No.: 858-942-2230

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

CAUTION

You are cautioned that any changes or modifications not expressly approved in this manual could void your authority to operate this equipment.
**Note:**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The supplied interface cable must be used with the equipment in order to comply with the limits for a digital device pursuant to Subpart B of Part 15 of FCC Rules.

---

**For Customers in Europe**

This product has been tested and found compliant with the limits set out in the EMC Directive for using connection cables shorter than 3 meters (9.8 feet).

**Attention**

The electromagnetic fields at the specific frequencies may influence the picture and sound of this unit.

**Notice**

If static electricity or electromagnetism causes data transfer to discontinue midway (fail), restart the application or disconnect and connect the communication cable (USB, etc.) again.

**Disposal of Old Electrical & Electronic Equipment (Applicable in the European Union and other European countries with separate collection systems)**

This symbol on the product or on its packaging indicates that this product shall not be treated as household waste. Instead it shall be handed over to the applicable collection point for the recycling of electrical and electronic equipment. By ensuring this product is disposed of correctly, you will help prevent potential negative consequences for the environment and human health, which could otherwise be caused by inappropriate waste handling of this product. The recycling of materials will help to conserve natural resources.

For more detailed information about recycling of this product, please contact your local Civic Office, your household waste disposal service or the shop where you purchased the product.
Disposal of waste batteries
(applicable in the European Union
and other European countries with
separate collection systems)

This symbol on the battery or on the packaging
indicates that the battery provided with this
product shall not be treated as household waste.
By ensuring these batteries are disposed of
correctly, you will help prevent potentially
negative consequences for the environment and
human health which could otherwise be caused by
inappropriate waste handling of the battery. The
recycling of the materials will help to conserve
natural resources.

In case of products that for safety, performance or
data integrity reasons require a permanent
connection with an incorporated battery, this
battery should be replaced by qualified service
staff only. To ensure that the battery will be
treated properly, hand over the product at end-of-
life to the applicable collection point for the
recycling of electrical and electronic equipment.
For all other batteries, please view the section on
how to remove the battery from the product
safely.

Hand the battery over to the applicable collection
point for the recycling of waste batteries.
For more detailed information about recycling of
this product or battery, please contact your local
Civic Office, your household waste disposal
service or the shop where you purchased the
product.

Notice for the customers in the
countries applying EU Directives

The manufacturer of this product is Sony
Corporation, 1-7-1 Konan Minato-ku Tokyo, 108-
0075 Japan. The Authorized Representative for
EMC and product safety is Sony Deutschland
GmbH, Hedelfinger Strasse 61, 70327 Stuttgart,
Germany. For any service or guarantee matters
please refer to the addresses given in separate
service or guarantee documents.

Notice for customers in the
United Kingdom

A moulded plug complying with BS 1363 is fitted
to this equipment for your safety and
convenience.
Should the fuse in the plug supplied need to be
replaced, a fuse of the same rating as the supplied
one and approved by ASTA or BSI to BS 1362,
(i.e., marked with an \(\oplus\) or \(\ominus\) mark) must be
used.
If the plug supplied with this equipment has a
detachable fuse cover, be sure to attach the fuse
cover after you change the fuse. Never use
the plug without the fuse cover. If you should lose the
fuse cover, please contact your nearest Sony
service station.

Notes on using the camera

Internal memory and “Memory Stick Duo” back up

Do not turn off the camera, remove the battery pack, or remove the “Memory Stick Duo” while the access lamp is lit. Otherwise, the internal memory data or “Memory Stick Duo” may be damaged. Be sure to make a backup copy to protect your data.

Notes on recording/playback

• Before you start recording, make a trial recording to make sure that the camera is working correctly.
• The camera is neither dust-proof, nor splash-proof, nor water-proof. Read “Precautions” (page 37) before operating the camera.
• Avoid exposing the camera to water. If water enters inside the camera, a malfunction may occur. In some cases, the camera cannot be repaired.
• Do not aim the camera at the sun or other bright light. It may cause the malfunction of the camera.
• Do not use the camera near a location that generates strong radio waves or emits radiation. Otherwise, the camera may not properly record or play back images.
• Using the camera in sandy or dusty locations may cause malfunctions.
• If moisture condensation occurs, remove it before using the camera (page 37).
• Do not shake or strike the camera. It may cause a malfunction and you may not be able to record images. Furthermore, the recording media may become unusable or image data may be damaged.
• Clean the flash surface before use. The heat of flash emission may cause dirt on the flash surface to become discolored or to stick to the flash surface, resulting in insufficient light emission.

Notes on the LCD screen and lens

• The LCD screen is manufactured using extremely high-precision technology so over 99.99% of the pixels are operational for effective use. However, some tiny black and/or bright dots (white, red, blue or green) may appear on the LCD screen. These dots are a normal result of the manufacturing process, and do not affect the recording.
• When the battery level becomes low, the lens might stop moving. Insert a charged battery pack and turn on the camera again.

On image data compatibility

• The camera conforms with DCF (Design rule for Camera File system) universal standard established by JEITA (Japan Electronics and Information Technology Industries Association).
• Sony does not guarantee that the camera will play back images recorded or edited with other equipment, or that other equipment will play back images recorded with the camera.

Warning on copyright

Television programs, films, videotapes, and other materials may be copyrighted. Unauthorized recording of such materials may be contrary to the provisions of the copyright laws.

No compensation for damaged content or recording failure

Sony cannot compensate for failure to record or loss or damage of recorded content due to a malfunction of the camera or recording media, etc.
Getting started

Checking the accessories supplied

- Battery charger BC-CSGB/BC-CSGC (1)
- Power cord (mains lead) (1)
  (not supplied in the USA and Canada)
- Rechargeable battery pack NP-BG1 (1)/Battery case (1)
- USB, A/V cable for multi-use terminal (1)
- Wrist strap (1)
- CD-ROM (1)
  - Cyber-shot application software
  - “Cyber-shot Handbook”
  - “Cyber-shot Step-up Guide”
- Instruction Manual (this manual) (1)

Attach the strap and place your hand through the loop to prevent the camera from damage by being dropped.
1 Preparing the battery pack

1 Insert the battery pack into the battery charger.

2 Connect the battery charger to the wall outlet (wall socket).

   The CHARGE lamp lights up, and charging starts.
   When the CHARGE lamp turns off, charging is finished (Normal charge).
   If you continue charging the battery pack for about one more hour (until it is fully charged), the charge will last slightly longer.

Charging time

<table>
<thead>
<tr>
<th></th>
<th>Full charge time</th>
<th>Normal charge time</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Approx. 330 min.</td>
<td>Approx. 270 min.</td>
</tr>
</tbody>
</table>

- The table above shows the time required to charge a fully depleted battery pack at a temperature of 25 °C (77 °F). Charging may take longer depending on conditions of use and circumstances.
- See page 31 for the number of images that can be recorded.
- Connect the battery charger to the nearest wall outlet (wall socket).
- Even if the CHARGE lamp is not lit, the battery charger is not disconnected from the AC power source (mains) as long as it is connected to the wall outlet (wall socket). If some trouble occurs while using the battery charger, immediately shut off the power by disconnecting the plug from the wall outlet (wall socket).
- When charging is finished, disconnect the power cord (mains lead) from the wall outlet (wall socket), and remove the battery pack from the battery charger.
- Designed for use with compatible Sony batteries.
2 Inserting the battery pack/a “Memory Stick Duo” (not supplied)

1. Open the battery/“Memory Stick Duo” cover.
2. Insert the “Memory Stick Duo” (not supplied).
3. Insert the battery pack.
4. Close the battery/“Memory Stick Duo” cover.

When there is no “Memory Stick Duo” inserted
The camera records/plays back images using the internal memory (approx. 15 MB).

To check the remaining battery charge
Press POWER to turn on and check the remaining battery charge on the LCD screen.

<table>
<thead>
<tr>
<th>Remaining charge indicator</th>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>[                     ]</td>
<td>Sufficient power remaining</td>
</tr>
<tr>
<td>[                     ]</td>
<td>Battery almost fully charged</td>
</tr>
<tr>
<td>[                     ]</td>
<td>Battery half full</td>
</tr>
<tr>
<td>[                     ]</td>
<td>Battery low, recording/playback will stop soon</td>
</tr>
<tr>
<td>[                     ]</td>
<td>Change the battery with fully charged one, or charge the battery. (The warning indicator flashes.)</td>
</tr>
</tbody>
</table>

- If you use the NP-FG1 battery pack (not supplied), the minutes also appear after the battery remaining indicator ( 60 Min).
- It takes about one minute until the correct remaining charge indicator appears.
- The remaining charge indicator may not be correct depending on conditions of use and circumstances.
- The Clock Set screen appears when you turn on the camera for the first time (page 13).
To remove the battery pack/“Memory Stick Duo”

Open the battery/“Memory Stick Duo” cover.

“Memory Stick Duo”

Slide the battery eject lever.

Be sure not to drop the battery pack.

Make sure that the access lamp is not lit, then push the “Memory Stick Duo” in once.

Battery pack

Never remove the battery pack/“Memory Stick Duo” when the access lamp is lit. This may cause damage to data in the “Memory Stick Duo”/internal memory.
3 Turning the camera on/setting the clock

1 Press POWER button.

2 Set the clock with the control button.
   1 Select the date display format with ▲/▼, then press ●.
   2 Select each item with ◀/▶ and set the numeric value with ▲/▼, then press ●.
   3 Select [OK], then press ●.

- The camera does not have a feature for superimposing dates on images. By using “Picture Motion Browser” in the CD-ROM (supplied), you can print or save images with the date.
- Midnight is indicated as 12:00 AM, and noon as 12:00 PM.

To change the date and time
Press HOME button, and select [ Clock Settings] in (Settings) (pages 21, 22).

Notes on when the power is turned on
- Once the battery pack is inserted in the camera, it may take time before operation becomes possible.
- If the camera is running on battery power and you do not operate the camera for about three minutes, the camera turns off automatically to prevent wearing down the battery pack (Auto power-off function).
Shooting images easily

1 Select the desired function from the mode dial.
   When shooting still images (Auto Adjustment mode): Select 📷.
   When shooting movies: Select 🎥.

2 Hold the camera, with your elbows pressed against your body to steady it.

3 Shoot with the shutter button.
   When shooting still images:
   1 Press and hold the shutter button halfway down to focus.
      The ● (AE/AF lock) indicator (green) flashes, a beep sounds, the indicator stops flashing and remains lit.
   2 Press the shutter button fully down.

   When shooting movies:
   Press the shutter button fully down.
   To stop recording, press the shutter button fully down again.

- The shortest shooting distance is approximately 5 cm (2 inches) (W)/34 cm (1 foot 1 1/2 inches) (T) (from the front of the lens).
Mode dial/Zoom/Flash/Macro/Self-timer/Display

Using the mode dial

Set the mode dial to the desired function.

- **Auto Adjustment**
  Allows you to shoot with the settings adjusted automatically.

EASY Easy Shooting

- **Easy Shooting**
  Allows easy shooting with easy-to-see indicators.

- **Program Auto**
  Allows you to shoot with the exposure adjusted automatically (both the shutter speed and the aperture value). You can adjust other settings using the menu.

- **Manual Exposure Shooting**
  Allows you to shoot after adjusting the exposure manually (both the shutter speed and the aperture value).

- **Movie Mode**
  Allows you to record movies with audio.

- **High Sensitivity**
  Shoots images without a flash even in low lighting.

- **Extra High Sensitivity**
  Allows you to shoot images with maximum sensitivity. The image size is set to [3M].

- **Extra High-speed Burst**
  Allows you to shoot maximum 5 frames per second in extra high-speed burst. The image size is set to [3M].

- **Smile Shutter**
  When the camera detects a smile, the shutter is released automatically. For details, see page 17.

SCN Scene Selection

Selects a setting from the Scene Selection menu.

**Scene Selection in SCN mode**

Press MENU and select a setting.

- **Soft Snap**
  Shoots images with a softer atmosphere for portraits of people, flowers, etc.

- **Landscape**
  Shoots with the focus on a distant subject.

- **Twilight Portrait**
  Shoots sharp images of people in a dark place without losing the nighttime atmosphere.

- **Twilight**
  Shoots night scenes without losing the nighttime atmosphere.

- **Beach**
  Shoots seaside or lakeside scenes with the blueness of the water captured more vividly.

- **Snow**
  Shoots snow scenes in white more clearly.
Fireworks
Shoots fireworks in all their splendor.

Underwater
Shoots underwater in natural colors using a waterproof housing.

W/T Using the zoom
Press T to zoom, press W to undo zoom.

Flash (Selecting a flash mode for still images)
Press ▶ (Flash) on the control button repeatedly until the desired mode is selected.

Flash Auto
Flushes when there is insufficient light or backlight (default setting).

Flash forced on

Slow synchro (Flash forced on)
The shutter speed is slow in a dark place to clearly shoot the background that is out of flash light.

Flash forced off

Macro (Shooting close-up)
Press ◊ (Macro) on the control button repeatedly until the desired mode is selected.

Auto
The camera adjusts the focus automatically from distant subjects to close-up.
Normally, put the camera in this mode.

Macro
The camera adjusts the focus with priority on close-up subjects. Set Macro On when shooting close subjects.

Using the self-timer
Press ◄ (Self-timer) on the control button repeatedly until the desired mode is selected.

Not using the self-timer

Setting the 10-second delay self-timer

Setting the 2-second delay self-timer
When you press the shutter button, the self-timer lamp flashes and a beep sounds until the shutter operates.

DISP Changing the screen display
Press ▲ (DISP) on the control button.
Each time you press ▲ (DISP), the display and brightness changes as follows:
Indicators on → Indicators on* → Histogram on* → Indicators off* → LCD screen off

* The brightness of the LCD Backlight is set to up.
Shooting in Smile Shutter mode

When the camera detects a smile, the shutter is released automatically.

1 Select ☺ (Smile Shutter) mode from the mode dial.

2 Press the shutter button halfway down to adjust the focus while aiming the camera at the subject to be shoot.

3 Press the shutter button all the way down.

The Smile Shutter enters standby.

Each time the smile level reaches the set Smile Detection Sensitivity (indicated by ●), the camera automatically operates the shutter and records up to six images. After recording the image, the Smile Shutter lamp lights.

4 Press the shutter button all the way down again to exit the Smile Shutter mode.

- When the Smile Shutter is in standby, the Record lamp (Orange) flashes.
- Shooting using the Smile Shutter ends automatically when either the “Memory Stick Duo” or internal memory becomes full or when six images have been recorded.
- You can select the subject that has priority for smile detection with [Smile Detection] (page 24).
- If a smile is not detected, set the [Smile Detection Sensitivity] (page 24).
- You can have the camera shoot the image automatically when any person displayed in the smile detection frame (Orange) smiles after pressing the shutter button all the way down.
- The image may not be in focus if the distance between the camera and the subject is changed after pressing the shutter button all the way down. The suitable exposure may not be obtained if the surrounding brightness changes.
- Faces may not be detected correctly when:
  - It is too dark or too bright.
  - Faces are partially hidden by sunglasses, masks, hats, etc.
  - The subjects are not facing the camera.
- Smiles may not be detected correctly depending on the conditions.
- You cannot use the Digital Zoom function.
- You cannot change the zoom ratio when the Smile Shutter is in standby.
**Viewing/deleting images**

1. **Press ➤ (Playback).**
   
   If you press ➤ when the camera is powered off, the camera is turned on automatically and set to playback mode. To switch to the shooting mode, press ➤ again.

2. **Select an image with ◀/▶ on the control button.**
   
   **Movie:**
   
   Press ● to play back a movie. (Press ● again to stop playback.)
   
   Press ▶ to fast forward, ◀ to rewind. (Press ● to return to normal playback.)
   
   Press ◀ to display the volume control screen, then press ◀/▶ to adjust the volume.

   • Sometimes images shot using earlier Sony models cannot be played back.
   
   Press the HOME button, select [Folder View] from (View Images), then play back the images.

3. **To delete images**
   
   1. Display the image you want to delete, then press MENU.
   2. Select [Delete] with ▲/▼ and select [This Image] with ◀/▶, then press ●.
   3. Select [OK] with ▲, then press ●.

4. **To view an enlarged image (playback zoom)**
   
   Press ◇ while displaying a still image. To undo the zoom, press ◇.
   
   Adjust the position with ▲/▼/◄/►.
   
   To cancel the playback zoom, press ●.
To view an index screen
Press (Index) to display the index screen while a still image is displayed. Then, select an image with ▲/▼/◄/►. To return to the single image screen, press ●.

- In the default setting, images are displayed in Date View (when using the “Memory Stick Duo”) or in Folder View (when using the internal memory).
- You can change the View Mode by selecting (View Images) on the HOME screen when using the “Memory Stick Duo” (page 22).
- Each time you press (Index), the number of images on the index screen increases.

To delete images in index mode

1 Press MENU while the index screen is displayed.
2 Select [Delete] with ▲/▼ and select [Multiple Images] with ◄/►, then press ●.
3 Select the image you want to delete with ▲/▼/◄/►, then press ●.

The ✔ mark is checked in the checkbox of the image.
To cancel a selection, select an image you have selected for deletion, then press ● again.

4 Press MENU and select [OK] with ▲, then press ●.
- To delete all the images of a date/folder, select [All Images in Date Range]/[All In This Folder] in step 2, then press ●.

To play back a series of images with effects and music (Slideshow)

1 Press (Slideshow) button. The setup screen appears.
2 Press (Slideshow) button again.
The music will change together with the [Effects]. You can also transfer and change the music to your desired music.

To transfer and change the music, take the following steps.

1 Press the HOME button. Then select [Music Tool] → [Download Music] in (Slideshow) (page 22).
2 Install the software included in the CD-ROM (supplied) to your computer.
3 Connect the camera and a computer with USB cable.
4 Start up “Music Transfer” installed to your computer and change the music.
For details on changing the music, refer to Help in “Music Transfer”.

19
To view images on TV
Connect the camera to the TV with the cable for multi-use terminal (supplied).

To view on HD (High Definition) TV, an HD Output Adaptor Cable (not supplied) is needed.

• If you set the image size to [16:9], you can record images in the size that fills the entire screen of the HD TV.
• You cannot view movies output in [HD (1080i)] signal format. Set [COMPONENT] to [SD] when shooting movies.
Learning the various functions – HOME/Menu

Using the HOME screen

The HOME screen is the gateway screen for all the functions of the camera, and can be called up regardless of the mode setting (shooting/viewing).

1 Press HOME to display the HOME screen.

2 Select a category with ◀/▶ on the control button.

3 Select an item with ▲/▼, then press ●.

When you select the ▼ (Manage Memory) or ◄ (Settings) category

1 Select the desired setting with ▲/▼, then press ●.
   • The HOME screen is displayed by pressing ◀.

2 Select a setting with ▲/▼, then press ●.
   • The camera is set to the shooting or viewing mode by pressing the HOME button again.
HOME items

Pressing HOME displays the following items. Only the available items are displayed on the screen. Details on each item are displayed in the guide at the bottom of the screen.

<table>
<thead>

Using menu items

1 Press MENU to display the menu.

- The menu will be displayed only during shooting and playback mode.
- Different items will become visible depending on the selected mode.

2 Select a desired menu item with ▲/▼ on the control button.

- If the desired item is hidden, keep pressing ▲/▼ until the item appears on the screen.

3 Select a setting with ◀/▶.

- If the desired item is hidden, keep pressing ◀/▶ until the item appears on the screen.
- Select an item in playback mode, then press •.

4 Press MENU to turn off the menu.
**Menu items**

The available menu items vary depending on the mode setting (shooting/viewing), and the mode dial position in the shooting mode. Only the available items are displayed on the screen.

Enjoying your computer

You can view images shot with the camera on a computer. By using the software in the CD-ROM (supplied), you can enjoy still images and movies from the camera more than ever. For details, refer to “Cyber-shot Handbook” in the CD-ROM (supplied).

Supported Operating Systems for USB connection and application software (supplied)

<table>
<thead>
<tr>
<th></th>
<th>For Windows users</th>
<th>For Macintosh users</th>

<tr>
<td></td>
<td>Windows 2000 Professional SP4, Windows XP* SP2, Windows Vista*</td>
<td></td>
</tr>
</tbody>
</table>

* 64-bit editions and Starter (Edition) are not supported.

• Your computer must be pre-installed with an OS listed above. OS upgrades are not supported.

• If your OS does not support USB connections, copy images by inserting the “Memory Stick Duo” into the Memory Stick slot on your computer, or use a commercially available Memory Stick Reader/Writer.

• For further details on the operating environment of “Picture Motion Browser” Cyber-shot application software, refer to “Cyber-shot Handbook”.

26
“Cyber-shot Handbook” in the CD-ROM (supplied) explains how to use the camera in detail. Adobe Reader is required to view it.

For Windows users

1 Turn on your computer, and insert the CD-ROM (supplied) into the CD-ROM drive. The screen below appears.

When you click the [Cyber-shot Handbook] button, the screen for copying “Cyber-shot Handbook” appears.

2 Follow the on-screen instructions to copy.
   • When you install “Cyber-shot Handbook”, the “Cyber-shot Step-up Guide” will be installed automatically.

3 After the installation is complete, double-click the shortcut created on the desktop.

For Macintosh users

1 Turn on your computer, and insert the CD-ROM (supplied) into the CD-ROM drive.

3 After copying is complete, double-click “Handbook.pdf”.
Indicators on the screen

Each time you press ▲ (DISP) on the control button, the display changes (page 16).

When shooting still images

- The indicators are limited in Easy Shooting mode.

Battery life and memory capacity

Battery life and number of images you can record/view

The numbers shown in the following tables assume a fully charged battery pack (supplied) is used at an ambient temperature of 25 °C (77 °F). The numbers shown for images you can record/view are approximations and allow for changing of the “Memory Stick Duo” as necessary. Note that the actual numbers may be less than those indicated in the table depending on the conditions of use.

When shooting still images

<table>
<thead>
<tr>
<th>LCD screen</th>
<th>Battery life (min.)</th>
<th>No. of Images</th>
</tr>
</thead>
<tbody>
<tr>
<td>On</td>
<td>Approx. 150</td>
<td>Approx. 300</td>
</tr>
<tr>
<td>Off</td>
<td>Approx. 170</td>
<td>Approx. 340</td>
</tr>
</tbody>
</table>

- Shooting in the following situations:
  - [REC Mode] is set to [Normal].
  - [AF Mode] is set to [Single].
  - [SteadyShot] is set to [Shooting].
  - Shooting once every 30 seconds.
  - The zoom is switched alternately between the W and T ends.
  - The flash strobes once every two times.
  - The power turns on and off once every ten times.
- The measurement method is based on the CIPA standard.
(CIPA: Camera & Imaging Products Association)
- The battery life and the number of images do not change, regardless of image size.

When viewing still images

<table>
<thead>
<tr>
<th>Battery life (min.)</th>
<th>No. of Images</th>
</tr>
</thead>
<tbody>
<tr>
<td>Approx. 370</td>
<td>Approx. 7400</td>
</tr>
</tbody>
</table>

- Viewing single images in order at about three second intervals

Notes on the battery pack

- Battery capacity decreases over time and through repeated use.
- The battery life and the number of images you can record/view are decreased under the following conditions:
  - The surrounding temperature is low.
  - The flash is used frequently.
  - The camera has been turned on and off many times.
  - The zoom is used frequently.
  - The brightness of LCD Backlight is set to up.
  - [AF Mode] is set to [Monitor].
  - [SteadyShot] is set to [Continuous].
  - The battery power is low.
  - The Face Detection function is activated.

LCD screen

Battery life (min.) | No. of Images
--------------------|---------------
Approx. 150         | Approx. 300   
Approx. 170         | Approx. 340   

Approx. 370         | Approx. 7400  

• Viewing single images in order at about three second intervals

Notes on the battery pack

• Battery capacity decreases over time and through repeated use.
• The battery life and the number of images you can record/view are decreased under the following conditions:
  - The surrounding temperature is low.
  - The flash is used frequently.
  - The camera has been turned on and off many times.
  - The zoom is used frequently.
  - The brightness of LCD Backlight is set to up.
  - [AF Mode] is set to [Monitor].
  - [SteadyShot] is set to [Continuous].
  - The battery power is low.
  - The Face Detection function is activated.
Recordable number of still images and recordable time of movies

The number of still images and the length of time for movies may vary depending on the shooting conditions.

- Even if the capacity of your recording media is the same as the one in the table below, the number of still images and the length of time for movies may be different.
- You can select the image size from the menu (pages 23, 24).

<table>
<thead>

</tr>
</tbody>
</table>

- The numbers of images listed assume [REC Mode] is set to [Normal].
- When the number of remaining shootable images is greater than 9,999, the “>9999” indicator appears.
- When an image was recorded using earlier Sony models and is played back on the camera, the image may not appear in the actual image size.
## The approximate recordable time of movies

The numbers in the table below show the approximate maximum recordable time obtained by totaling all movie files. The maximum length of time you can shoot continuously is about 10 minutes.

(Units: hour : minute : second)

<table>
<thead>
<tr>
<th>Size</th>
<th>Approx. 15 MB</th>
<th>Internal memory</th>
<th>“Memory Stick Duo” formatted with the camera</th>
</tr>
</thead>
<tbody>
<tr>
<td>640(Fine)</td>

<td></td>
</tr>
</tbody>
</table>

- Movies with the size set to [640(Fine)] can only be recorded on a “Memory Stick PRO Duo”.
- The camera does not support HD recordings or playbacks for movies.
Troubleshooting

If you experience trouble with the camera, try the following solutions.

1. Check the items below, and refer to “Cyber-shot Handbook” (PDF).
   If a code such as “C/E:☐☐:☐☐” appears on the screen, refer to “Cyber-shot Handbook”.

2. Remove the battery pack, wait for about one minute, re-insert the battery pack, then turn on the power.

3. Initialize the settings (page 22).

4. Consult your Sony dealer or local authorized Sony service facility.

Be aware that by sending the camera for repair, you give consent that the contents of the internal memory, Music files may be checked.

Battery pack and power

Cannot insert the battery pack.
- Insert the battery pack correctly to push the battery eject lever (page 11).

Cannot turn on the camera.
- After inserting the battery pack into the camera, it may take a few moments for the camera to power up.
- Insert the battery pack correctly (page 11).
- The battery pack is discharged. Insert charged battery pack (page 10).
- The battery pack is dead. Replace it with a new one.
- Use a recommended battery pack.

The power turns off suddenly.
- If you do not operate the camera for about three minutes while the power is on, the camera turns off automatically to prevent wearing down the battery pack. Turn on the camera again (page 13).
- The battery pack is dead. Replace it with a new one.
The remaining charge indicator is incorrect.

• This phenomenon occurs when you use the camera in an extremely hot or cold location.
• A discrepancy arose between the remaining charge indicator and the actual remaining battery charge. Fully discharge the battery pack once, then charge it to correct the indication.
• The battery pack is discharged. Insert the charged battery pack (page 10).
• The battery pack is dead. Replace it with a new one.

Cannot charge the battery pack.

• You cannot charge the battery pack using the AC Adaptor (not supplied). Use the battery charger (supplied) to charge the battery.

Shooting still images/movies

Cannot record images.

• Check the free capacity of the internal memory or “Memory Stick Duo” (page 32). If it is full, do one of the following:
  – Delete unnecessary images (page 18).
  – Change the “Memory Stick Duo”.
• You cannot record images while charging the flash.
• When shooting a still image, set the mode dial to a position other than .
• Set the mode dial to  when shooting movies.
• The image size is set to [640(Fine)] when recording movies. Do one of the following:
  – Set the image size to other than [640(Fine)].
  – Insert a “Memory Stick PRO Duo”.

Vertical streaks appear when you are shooting a very bright subject.

• The smear phenomenon is occurring and white, black, red, purple, or other streaks appear on the image. This phenomenon is not a malfunction.
**Viewing images**

**Cannot play back images.**

- Press [►] (Playback) (page 18).
- The folder/file name has been changed on your computer.
- Sony does not guarantee playback of image files on the camera if the files have been processed using a computer or recorded with another camera.
- The camera is in USB mode. Delete the USB connection.
- Playback is impossible if the Smile Shutter is in standby mode. Exit standby mode by pressing the shutter button all the way down.
- This is caused by copying images on the PC to the “Memory Stick Duo” without using the “Picture Motion Browser”. Play such images in Folder View (page 22).
- Sometimes a “Memory Stick Duo” containing images shot with earlier Sony models cannot be played back. Play such images in Folder View (page 22).
Precautions

Do not use/store the camera in the following places

- In an extremely hot, cold or humid place
  In places such as in a car parked in the sun, the camera body may become deformed and this may cause a malfunction.
- Under direct sunlight or near a heater
  The camera body may become discolored or deformed, and this may cause a malfunction.
- In a location subject to rocking vibration
- Near strong magnetic place
- In sandy or dusty places
  Be careful not to let sand or dust get into the camera. This may cause the camera to malfunction, and in some cases this malfunction cannot be repaired.

On carrying

Do not sit down in a chair or other place with the camera in the back pocket of your trousers or skirt, as this may cause malfunction or damage the camera.

On cleaning

Coffee cleaning

Cleaning the LCD screen
Wipe the screen surface with an LCD cleaning kit (not supplied) to remove fingerprints, dust, etc.

Cleaning the lens
Wipe the lens with a soft cloth to remove fingerprints, dust, etc.

Cleaning the camera surface
Clean the camera surface with a soft cloth slightly moistened with water, then wipe the surface with a dry cloth. To prevent damage to the finish or casing:
   - Do not expose the camera to chemical products such as thinner, benzine, alcohol, disposable cloths, insect repellent, sunscreen or insecticide.
   - Do not touch the camera with any of the above on your hand.
   - Do not leave the camera in contact with rubber or vinyl for a long time.

On operating temperatures

The camera is designed for use under the temperatures between 0°C and 40°C (32°F and 104°F). Shooting in extremely cold or hot places that exceed this range is not recommended.

On moisture condensation

If the camera is brought directly from a cold to a warm location, moisture may condense inside or outside the camera. This moisture condensation may cause a malfunction of the camera.

If moisture condensation occurs

Turn off the camera and wait about an hour for the moisture to evaporate. Note that if you shoot with moisture remaining inside the lens, images will not be clear.

On the internal rechargeable backup battery

The camera has an internal rechargeable battery for maintaining the date and time and other settings regardless of whether the power is on or off.

This rechargeable battery is continually charged as long as you are using the camera. However, if you use the camera for only short periods, it discharges gradually, and if you do not use the camera at all for about one month it becomes completely discharged. In this case, be sure to charge this rechargeable battery before using the camera.

However, even if this rechargeable battery is not charged, you can still use the camera, but the date and time will not be indicated.

Charging method of the internal rechargeable backup battery

Insert charged battery pack in the camera, and then leave the camera for 24 hours or more with the power off.
Specifications

Camera

[System]
Image device: 9.29 mm (1/1.7 type) color CCD, Primary color filter
Total pixel number of camera: Approx. 13.9 Megapixels
Effective pixel number of camera: Approx. 13.6 Megapixels
Lens: Carl Zeiss Vario-Tessar 3× zoom lens
f = 7.6 - 22.8 mm (35 - 105 mm (35 mm film equivalent)) F2.8(W) - 5.5(T)
Exposure control: Automatic exposure, Scene Selection (10 modes)
White balance: Automatic, Daylight, Cloudy, Fluorescent 1,2,3, Incandescent, Flash, One Push
Underwater White Balance: Auto, Underwater 1,2, Flash
File format (DCF compliant):
Still images: Exif Ver. 2.21 JPEG compliant, DPOF compatible
Movies: MPEG1 compliant (Monaural)
Recording media: Internal Memory (approx. 15 MB), “Memory Stick Duo”
Flash: Flash range (ISO sensitivity (Recommended exposure Index) set to Auto):
Approx. 0.2 to 5.5 m (7 7/8 inches to 18 feet 5/8 inches) (W)/approx. 0.4 to 2.8 m (1 foot 3 3/4 inches to 9 feet 2 1/4 inches) (T)

[Input and Output connectors]
Multi connector: Video output
Audio output (Monaural)
USB communication: Hi-Speed USB (USB 2.0 compliant)

[LCD screen]
LCD panel: 6.7 cm (2.7 type) TFT drive
Total number of dots: 230 400 (960 × 240) dots

[Power, general]
Power: Rechargeable battery pack
NP-BG1, 3.6 V
NP-FG1 (not supplied), 3.6 V
AC-LS5K AC Adaptor (not supplied), 4.2 V
Power consumption (during shooting, LCD screen on):
1.4 W
Operating temperature: 0 to 40°C (32 to 104°F)
Storage temperature: –20 to +60°C (–4 to +140°F)
Dimensions: 94.3 × 59.0 × 26.8 mm (3 3/4 × 2 3/8 × 1 1/16 inches) (W/H/D, excluding protrusions)
Mass: Approx. 187 g (6.6 oz) (including NP-BG1 battery pack, strap, etc.)
Microphone: Monaural
Speaker: Monaural
Exif Print: Compatible
PRINT Image Matching III: Compatible
PictBridge: Compatible

BC-CSGB/BC-CSGC battery charger
Power requirements: AC 100 V to 240 V, 50/60 Hz, 2.6 W (BC-CSGB)/2 W (BC-CSGC)
Output voltage: DC 4.2 V, 0.25 A
Operating temperature: 0 to 40°C (32 to 104°F)
Storage temperature: –20 to +60°C (–4 to +140°F)
Dimensions: Approx. 62 × 24 × 91 mm (2 1/2 × 31/32 × 3 5/8 inches) (W/H/D)
Mass: Approx. 75 g (2.7 oz)

Rechargeable battery pack NP-BG1
Used battery: Lithium-ion battery
Maximum voltage: DC 4.2 V
Nominal voltage: DC 3.6 V
Capacity: 3.4 Wh (960 mAh)
